Ms. Anna Drake
Environmental and Development Services
105 Service Drive
Yorktown, VA 23692

Dear Ms. Drake,

I once again must voice my disapproval for the proposed development at 102 Creek Circle.

It seems inappropriate to construct breakwaters and spurs that extend 140 feet into what is basically a public waterway that the citizens use for recreation, boating, fishing and crabbing. This area should not be taken out of public domain to the benefit of one homeowner.

While I realize that erosion control is the supposed issue for this project, I'm questioning the need for such an elaborate plan. Most residents in the area have used rip rap successfully.

It seems inappropriate to jeopardize the future navigability of 21 families for the sake of extending the beach for one family. The concern is the construction of spurs will allow additional sand etc. to shift into the Creek Circle canal as well as Cabin Creek

This board has already granted permission for the owner to build a home that is four times the average home size in the area despite the recommendation of your advisory board. Please remember that the residents of this area believe that this erosion project is also over the top.

Sincerely,

Mary Loesch
106 Creek Circle
Seaford, VA 23696
